### Handheld Upgrades the Algiz 8 Tablet PC

*The Algiz 8 tablet from Handheld gets a major upgrade, with Windows 7 operation system and a faster processor.*

Handheld, the Swedish based supplier of rugged terminals announces a major upgrade of its successful Algiz 8 tablet PC. The new version of the Algiz 8 will have the 1,6 GHz ATOM N270 processor from Intel Corporation and there is an expansion of the RAM from 1 to optional 2GB and the addition of solid state discs of up to 64 GB. The new version of the Algiz 8 will move to Windows 7 Professional as the standard operating system.

All other functionalities will remain the same with the option of built in GPS and 3G functionality as well as the outstanding screen with unprecedented quality and brightness of more than 1100 NITs.

*"Our tablet PC's has been very successful and the updates to the Algiz 8 will strengthen this outstanding line up even further",* said Jerker Hellström, CEO of the Handheld Group.

The new updated product is available immediately.
